Professional Summary

Computer Science undergraduate with practical experience in building real-world web applications using the MERN stack. Comfortable working across the full development lifecycle—from designing responsive user interfaces to developing efficient backend APIs. Strong problem-solving mindset with hands-on exposure to Python, Flask, and data visualization tools such as Excel, Power BI, and Tableau. Curious, quick to learn, and motivated to apply technology to solve meaningful problems while growing as a software and data professional.

Core Skills

- **Web & Frameworks:** HTML, CSS, JavaScript, React.js, Tailwind CSS
- **Programming & Backend:** Python, Java, Flask (Python), FastAPI, REST APIs
- **Deep Learning:** PyTorch, OpenCV, NumPy
- **Databases:** MySQL, MongoDB, SQLAlchemy
- **Data Analytics & BI:** Microsoft Excel, Power BI, Tableau
- **Developer Tools:** Git & GitHub, VS Code
- **Concepts:** Data Structures And Algorithms, OOP
- **Soft Skills:** Problem-Solving, Teamwork, Communication, Leadership

Experience

Software Intern July 2026 – Present
EPPS InfoTech *6 Months*

- Developed and maintained backend services using **FastAPI**, building RESTful APIs for core application features.
- Designed database models and schemas using **SQLAlchemy** for efficient data handling and persistence.
- Implemented data validation and serialization using **Pydantic** models to ensure robust API request/response handling.
- Debugged and optimized existing codebases, identifying and resolving issues to improve application stability and performance.

Education

- **AISSMS Institute of Information and Technology** *Sep 2022 – June 2026*
  B.Tech (Computer Engineering) Pune, India
  – CGPA: 7.26/10
- **Loyola Jr College** *Mar 2021 – Mar 2022*
  Class 12th – Maharashtra State Board Pune, India
  – Percentage: 75.00%
- **SNBP International School** *Jun 2019 – May 2020*
  Class 10th – CBSE Pune, India
  – Percentage: 88.88%

Projects

- **Satellite Image Segmentation using Deep Learning** *Completed*
  Tech: Python, PyTorch, OpenCV, NumPy Satellite Building Extraction
  – Developed a deep learning-based system for semantic segmentation of satellite imagery.
  – Built complete pipeline including preprocessing, mask generation, patch extraction, and dataset split (70-15-15).
  – Implemented and compared models: U-Net, DeepLabV3+, U-Net++, MAnet, and LinkNet.
- **InsightPoint - React-Based Analytics & News Platform** *Completed*
  Tech: React 19, Tailwind CSS, Framer Motion, Vite, React Router InsightPoint
  – Built a modern React-based platform combining real-time news delivery with analytics features.
  – Developed an interactive analytics dashboard for data visualization and insights.
  – Implemented smooth UI animations and transitions using Framer Motion.
